Projects

Production management system 05.2024 - 07.2024
Redesign and workflow enhancements of customers' internal system. System is used for production management (receiving parts, production and shipping).

I was responsible for:

- Requirements elicitation and documentation
- Communication with design team
- Elaborating and brainstorming new ideas
- Design validation
- Backlog preparation

Back office system support 07.2022 - 11.2023
Design and development of new core insurance system to support customer insurance business in Europe

I was responsible for:

- Requirements elicitation and documentation
- Working on processes improvements
- Conducting the Refinements sessions (stories and tasks presentation for the team)
- Issues and expected system behavior discussion with the team

Supply chain management system development 06.2021 - 06.2022
Run and Maintain project for the customer inhouse system to monitor projects and components/parts health. New product design creation and managing excess and obsolete.

I was responsible for:

Requirements elicitation and documentation

- Lead the Refinements sessions (stories and tasks presentation for the team)
- Wireframes development
- Sprint backlog prioritisation with PO and pushing it on planning sessions
- Issues and expected system behavior discussion with the team
- Substituting Scrum master

E-commerce product development 04.2021 - 06.2021
Development of a new version of the product. Extending functionality and updating already existed.

I was involved into:

- Analysing already existing functionality
- Analysing, requirements update, and creating the corresponding tickets for UX improvements (purchasing flow improvement)
- Started work on improving already existing and setting up new A/B tests

Supply chain management solution MVP 01.2021 - 04.2021
Web portal development. MVP product for the customer to create a standalone service to manage product designs.

As I joined the project almost in the middle, my main responsibility was to collect/summarize and well document project (processes, product description, requirements - functional and non-functional), so the team could proceed with development and at the same time verify what is done with the requirements.

Web portal 08.2020 - 12.2020
Web portal development

I was involved into:

- Requirements elicitation and documentation (SRS)
- Team collaboration for requirements implementation

Digital bank 05.2020 - 07.2020
Development for digital bank solution

I was involved into:

- Interaction with customer representative (BA, PO, SME)
- Requirements elicitation and documentation

Tablet application development 12.2019 - 04.2020
SPA Application: Mobile (iPad) and Backend development

I was involved into:

- Communication with customer representative and third party vendor (design studio)
- Requirements elicitation and documentation
- Team collaboration for requirements implementation
- Act as a feature/epic owner
- User story/Acceptance criteria preparation
- Backlog preparation

Audit web application 09.2019 - 10.2019
Development a pilot project for automation of Audit Process

I was responsible for:

- Requirements elicitation and documentation
- Customer communication
- Team collaboration for requirements implementation
- User story/Acceptance criteria preparation
- Backlog preparation
- Wireframes

Gambling portal development 12.2017 - 09.2019
Development and support for mobile version of gambling portal

I was involved into:

- Negotiation with customer and gathering information
- Communication and coordinating dev team
- Preparing functional requirements (Behavior Driven Development)
- Arranging meetings and providing a demo for the stakeholders
- User story/Acceptance criteria preparation
- Backlog preparation
- Wireframes

Customer HR web site 04.2017 - 11.2017
Development of new website for HR needs for customer

As a Project Manager was responsible for:

- communication with the customer
- coordination work and communication of developers development of work plan
- website maintenance and support after release

Website for university 06.2016 - 09.2016
Development of new website. We explored customer domain and proposed the best way to promote directions of education (landing pages).

As a Project Manager was responsible for:

- communication with the customer
- coordination work and communication of developers

Mobile app development 07.2016 - 07.2016
Development of mobile application for the local department of Total Dictation

As a Scrum Muster was responsible for:

- communication with the customer
- coordination work and communication of developers organization daily meeting

Thanks to the development of the scrum methodology, we release product (for 2 platforms: iOS and Android) in the shortest time.

Jewelry brand website 05.2016 - 07.2016
Development of new web-design for brand Madilyan

As a Project Manager was responsible for:

- coordination of developers
- presentation of new design
- collection of feedback (from the customer)
